Dear Sir or Madam

A140 Aylsham Bypass Bridge, Surfacing work

Norfolk County Council is planning to carry out essential carriageway resurfacing works on A140 Aylsham Bypass bridge. The construction work is programmed to begin on or around 5 September 2025 and are scheduled to last 6 nights, with expected completion on or around 13 September 2025, weather permitting.

To ensure that the works are carried out safely for road users, pedestrians, and the workforce we will complete the surfacing work under the road closures. To minimise the disruption to highway users, the road closures will be in place as following:

Surfacing on A140 Aylsham Bypass Bridge

From 5th September 2025 to 13th September 2025

Timing: 20:00pm to 05:00am

Vehicular access to properties and businesses within the closures will be maintained where possible, and a signed diversion route for vehicular traffic will be in place. Emergency services will be aware of the closures. For your information, please see drawing no. PMB950-HPD-0100-002A showing the site location and the diversion routes.

We endeavour to minimise the inconvenience caused by these works, but I hope that you will understand these requirements. If you do have any comments, please contact me either by mail, email or telephone.

Yours faithfully

Bimal Ranjit
Engineer, Highway Projects
Encl.
