Upcoming abnormal load movements

Dear Sir/Madam,

As part of the construction of the 60km underground cable route for RWE's three offshore wind projects, Vanguard West, Vanguard East and Boreas, we want to notify you that there will be a number of abnormal loads being transported through the region.

These movements will take place over the coming months, in a number of locations across our cable route corridor, starting in the week commencing 8th December 2025.

The working hours for these movements are dictated by the police and the permitting authority and vary depending on the season, local authority and other events in the area.

Our civils contractor (Murphys) will be engaging with localised communities ahead of the movements to minimise disruption where possible.

Should you or those that you represent have any questions, please do reach out to me directly.

Keep in touch

We thank you in anticipation for your understanding during these works, but if you have any queries or if you require further clarification on these activities, please contact me with the details below. If you would like to know more about the wider projects, please visit www.nowzone.co.uk. To keep up to date with other project updates and events across Norfolk, you can also subscribe to the Norfolk Zone e-newsletter, at: <https://bit.ly/NorfolkEnews>

Should you have any urgent queries that are outside of normal working hours, we also have a 24/7 freephone number, which is 0800 019 3517.

Yours faithfully,

Edward Robb, on behalf of Vanguard West, Vanguard East and Boreas offshore wind farm projects
